

International Association of Chiefs of Police

Juvenile Justice Training Needs Assessment: A Survey of Law Enforcement

July 2011

This project is supported by Cooperative Agreements 2009-JF-FX-0062 and 2010-MU-FX-K591 awarded by the Office of Juvenile Justice and Delinquency Prevention (OJJDP), Office of Justice Programs, U.S. Department of Justice. Points of view or opinions expressed in this document do not necessarily represent the official position or policies of these agencies.

Executive Summary

In early 2011, the International Association of Chiefs of Police (IACP) conducted the Juvenile Justice Training Needs Assessment Survey of law enforcement around the nation to identify challenges and training needs facing law enforcement in addressing juvenile crime, delinquency and victimization. The survey identifies law enforcement needs and priorities, and will enable IACP, as well as the Office of Juvenile Justice and Delinquency Prevention (OJJDP), to assist the law enforcement community in their efforts to address juvenile justice issues. The results will inform IACP when making decisions on future initiatives, new workshop selection, promising practice brief topics, and enriching existing training curricula. The results of this survey will also be used to further develop the IACP's new, proactive, evidence-based, youth-focused policing strategy that raises juvenile justice issues to new priority levels in law enforcement agencies, reduces juvenile disorder and criminal behavior, decreases youth victimization, and increases community wellness.

There were 672 responses to this national survey from participants representing 404 law enforcement agencies from 49 states and the District of Columbia. Participants represented agencies of varying sizes from rural, suburban, and urban geographic areas.

The Juvenile Justice Needs Assessment Survey revealed various challenges that law enforcement face within their departments and the broader criminal justice system that are barriers to effectively addressing juvenile crime, delinquency and victimization. For instance, the survey revealed that the primary reasons prohibiting law enforcement agencies from receiving juvenile justice training are lack of funding and agency resources (manpower). In fact, over half of all agencies that responded had a decrease in, or abolishment of, training budgets in the last five years.

The survey identified the most pressing issues and concerns facing law enforcement agencies relating to juvenile crime, delinquency and victimization as:

1. Substance Abuse
2. Abuse (physical, sexual and/or emotional)
3. Juvenile Repeat Offenders
4. Bullying/Cyberbullying
5. Gangs
6. Internet Crimes involving juveniles/youth (as perpetrator/victim)
7. Runaways
8. School Safety

It is clear from the survey data results, as well as the anecdotal evidence provided by survey participants, that law enforcement has a strong desire to improve how they address juvenile justice and youth issues, from the structure of their juvenile operations to the delivery of training specifically addressing the top youth issues affecting law enforcement agencies.

Introduction

The International Association of Chiefs of Police (IACP) conducted a juvenile justice training needs assessment survey of law enforcement around the nation to identify juvenile justice challenges and training needs. IACP's Juvenile Justice Training and Technical Assistance (JJTTA) Project will use the data collected to guide decisions on curriculum and resource development, training and technical assistance enhancement and delivery. The results of this survey will also be used to develop the IACP's new, proactive, youth-focused policing strategy which aims to raise juvenile justice issues to new priority levels within law enforcement agencies to ultimately reduce juvenile crime, delinquency, and victimization.

Methodology

Survey Instrument

The survey instrument (Appendix I) is comprised of 26 multiple choice and open-ended questions. It gathers information regarding agency and jurisdiction descriptors, departmental juvenile operations, departmental training, training needs, and contact information.

The survey instrument was reviewed and approved by the Office of Juvenile Justice and Delinquency Prevention before dissemination. The survey was converted electronically via Survey Monkey, which is online survey and assessment software. Through this software, survey participants could access the survey directly via a web link. Survey participants also had the option of requesting a hard copy of the survey via telephone, facsimile, e-mail, or mail. If a hard copy was requested, IACP staff e-mailed a hard copy to the participant. Hard copy responses could be submitted via facsimile, e-mail, or mail.

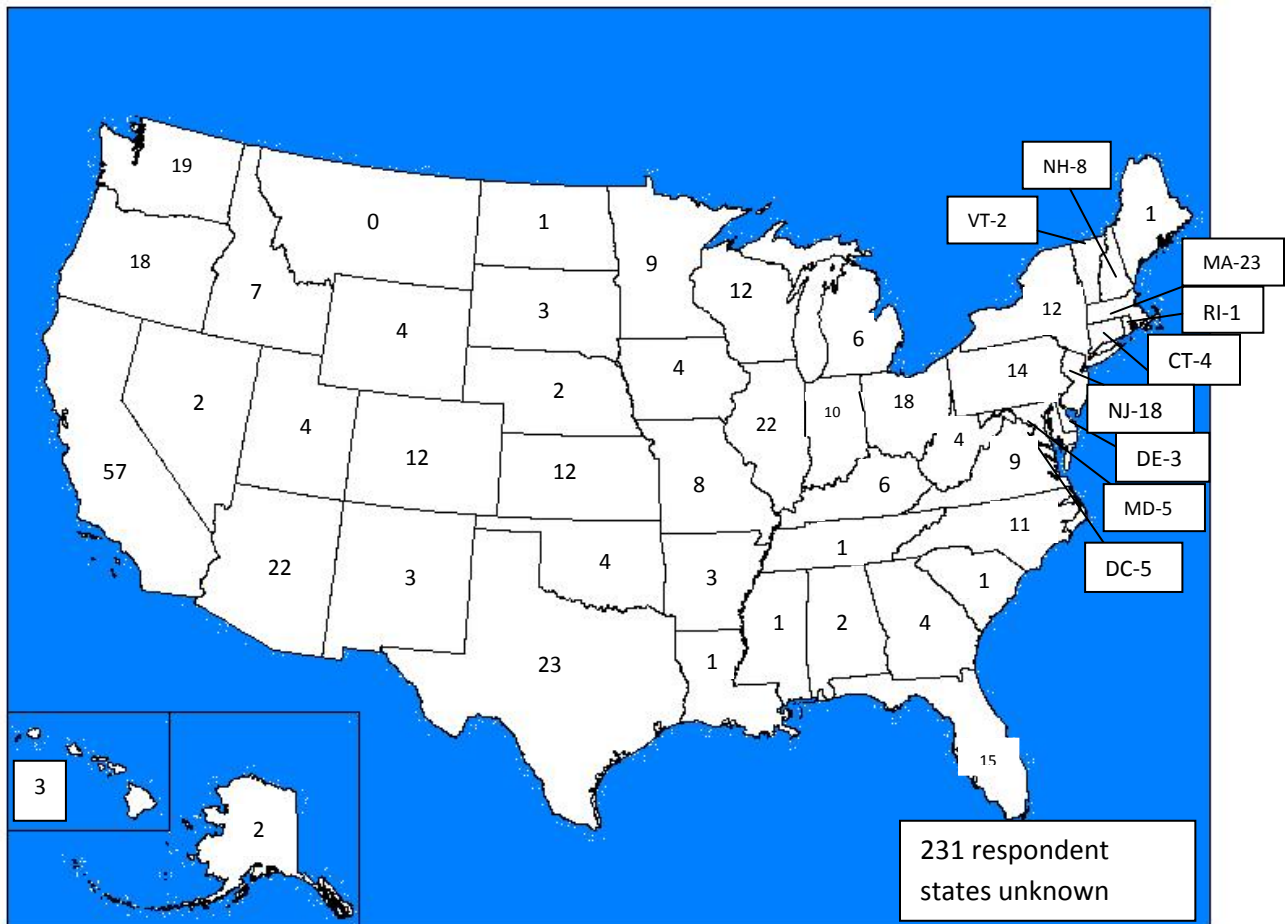

Data Collection

This cross-sectional needs assessment survey opened January 5, 2011 and closed May 1, 2011. Emails and newsletters containing information about the survey and the web link to access it were sent to thousands of individuals. Data from the probability sample was obtained from 672 responses, including command and administration staff from the following types of agencies:

- federal law enforcement agencies
- state police
- local police
- tribal police
- sheriff's offices
- law enforcement training agencies
- university/school campus police
- juvenile probation, parole, detention, and corrections centers
- military police
- state departments of justice offices
- district attorney's offices
- state attorney general's offices
- transit police
- peace officers standards and training (POST) boards.

Over 60% of responses (n=409) submitted a survey 100% complete, while 40% submitted a partially complete survey (n=263).

Sixty percent of responses included department name and contact information. Several departments had multiple responses from different divisions or units. In total, survey responses include 672 law enforcement personnel, with 404 agencies self-identifying and 252 agencies not submitting an agency name. Survey participants represented 49 states and the District of Columbia. The number of survey participants per state can be seen in the map below. In addition, Appendix II lists the agency names and locations for those survey participants who identified their departments.

This survey provides results from law enforcement personnel including members of:

- International Association of Chiefs of Police (IACP)
- National Association of School Resource Officers (NASRO)
- Regional Information Sharing Systems (RISS) Centers

- National Sheriff's Association (NSA)
- Regional Community Policing Institute (RCPI) Network
- International Association of Directors of Law Enforcement Standards and Training (IADLEST)
- National Association of Women Law Enforcement Executives (NAWLEE)

The survey was also sent to IACP Juvenile Justice training recipient alumni, the IACP International Managers of Police Academy and College Training (IMPACT) Section, and IACP Education and Training Committee members.

The survey was targeted to command staff with responsibility for and/or knowledge of department training needs. Individuals identified their positions as the following:

- police chief
- assistant police chief
- police captain
- police lieutenant
- police detective
- sergeant
- chief deputy
- training officer
- corporal
- general counsel
- major
- director
- senior parole officer
- juvenile detention officer
- administrative manager
- officer
- supervisor of security
- gang prevention coordinator
- district attorney investigator
- special agent
- assistant commissioner
- director of training
- commander
- deputy sheriff
- task force commander
- police officer
- detention supervisor
- instructor
- division administrator
- compliance officer
- school resource officer
- planning and research analyst
- counseling administrator
- deputy assistant director
- deputy regional director
- group supervisor
- investigation assistant
- investigator
- training supervisor
- juvenile justice specialist
- youth officer
- resident agent in charge
- records supervisor
- K9 handler
- program specialist
- probation officer
- director of public safety.

Data Limitations

The probability sample used for this survey may present potential selection bias. Out of 672 responses, 40% submitted a partial survey. This could result in non-response bias if the results from the completed surveys vary from the results of survey participants who did not fully complete the survey. To combat this, results have been tallied per response and statistics quoted and discussed are solely those responding for each question and not including agencies not responding to a particular question.

Coverage bias may be possible since the survey invitation and notice were disseminated electronically. Individuals without a computer or those individuals not included in the law enforcement networks targeted may not have had the opportunity to participate. Additionally, there may be some selection bias for individuals who are members of multiple networks receiving notice of the survey. It is possible individuals may have received more than one notice of the survey, and therefore may have been more likely to participate.

Data Analysis

Survey data was analyzed using Survey Monkey and Microsoft Excel software. Duplicate responses and responses outside of the law enforcement field were removed. Results for each question consist of only those survey participants who answered the question..

Responses were filtered and cross-tabbed for some variables, to examine responses for particular sectors of survey participants (e.g. top issues for rural agencies).

Results

Survey Population and Agency Type

The majority of survey participants, over 77%, were from police departments (n=518), as seen in Chart 1 below, with 10.7% choosing other (n=71), 6.6% sheriff's departments (n=44), 3.2% university/campus police or security (n=21) and 1.8 % state police (n=12). The other category captured:

- federal law enforcement
- parole
- probation
- corrections
- training agencies
- district attorney's offices
- task forces
- combined police/sheriff's agencies
- tribal agencies
- public school district police
- military
- transit police
- state agencies.

Chart 1

Chart 2 below shows the number of sworn officers within the survey participants' agencies. Over 19% have less than 20 officers (n=129) and over 11% have over 1000 officers (n=78). The majority (25.7%) of departments (n=365) have between 21 and 249 officers.

Chart 2

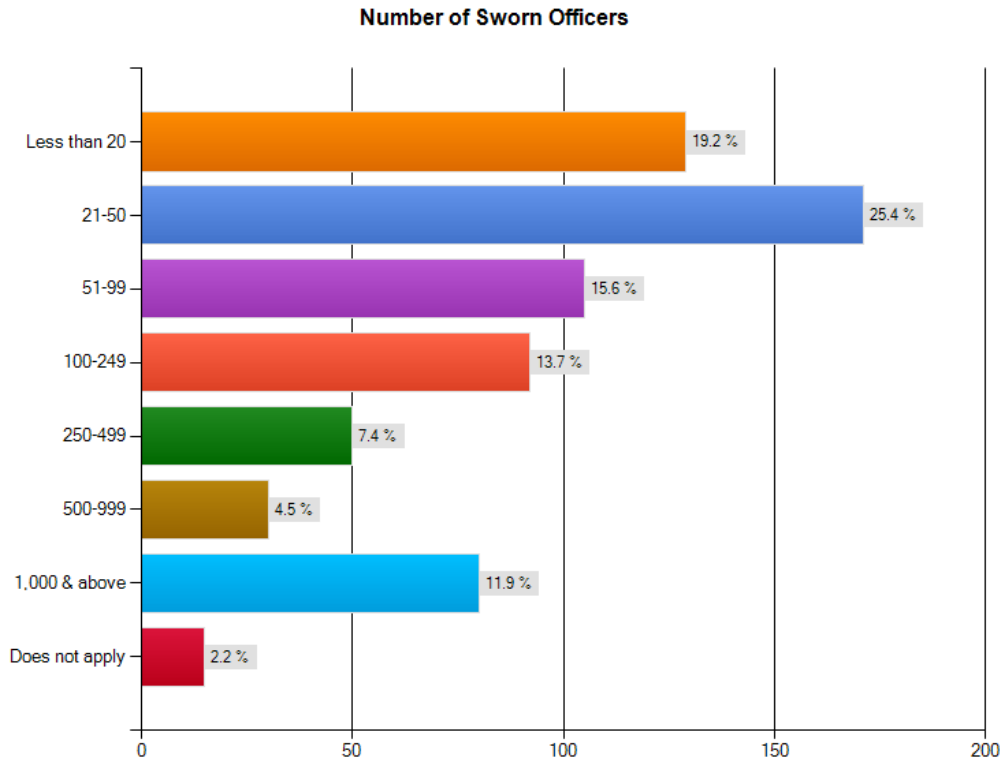

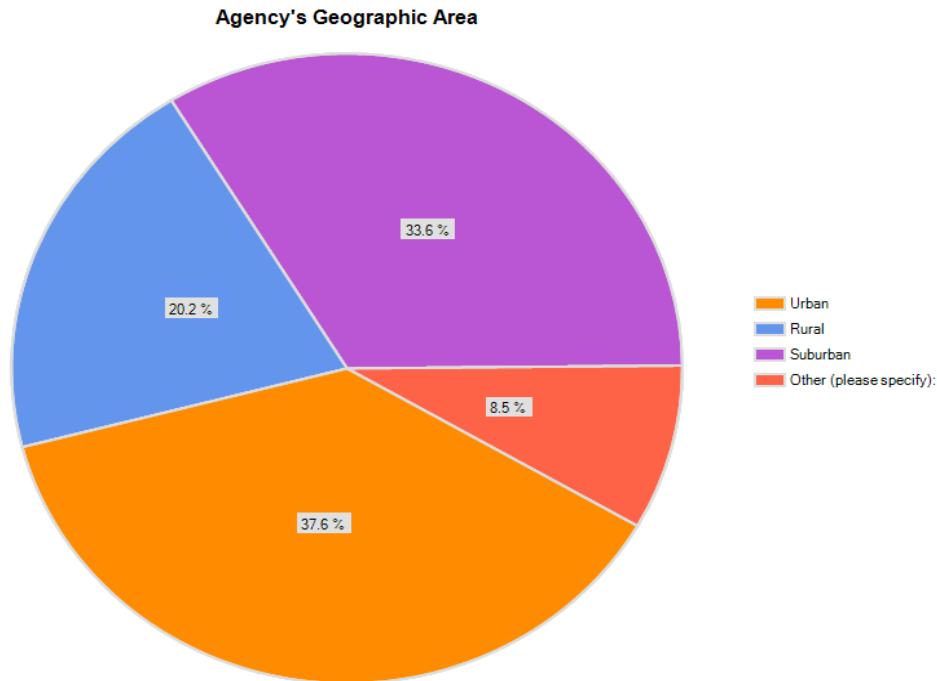

Chart 3 below shows the distribution of geographical types for the respondent's agency. Over 30% of survey participants indicated their jurisdictions are urban, versus 34% suburban and just over 20% rural. The other category captured responses such as: federal, port authority, multi-jurisdiction agencies and task forces, tribal, village/townships, the District of Columbia, school districts, and juvenile detention.

Chart 3

Juvenile Justice Operations

Staffing and Funding

Juvenile operations within the respondent's agencies widely vary in terms of structure for juvenile justice and youth services. Almost a third of departments do not have individual personnel assigned to juvenile operations, whereas 25% of departments have a centralized juvenile unit or division. Another 22% have at least one officer assigned to youth services and 16% have youth services provided by multiple units that are not centralized. Other responses include:

- a mixture of centralized youth services and education and decentralized juvenile casework
- no juvenile justice or youth services (n=2)
- use of county youth services
- school resource officers in place but no one dedicated to youth services or investigations
- mixture of centralized and decentralized depending on type of case
- varies
- collaboration with state department of juvenile justice
- work with other departments
- part-time officer only.

See Chart 4 below for further response data.

Chart 4

Structure of Agency's Juvenile/Youth Services

Sixty three percent of agencies with a centralized juvenile or youth unit staff the division with sworn officers, while 52% of agencies staff the unit with civilians and 27% staff it with volunteers. Some departments use a combination of all three staffing methods.

Several departments without centralized juvenile services noted their lack in effective youth policing without a specialized unit. One small, suburban police department Corporal noted “*We need a specialized officer or unit to deal with juvenile crime and issues specifically. We have a 26 man department and do not have the manpower or the resources to be able to specifically target juvenile crime and offenders.*”

A mid-sized, suburban sheriff’s office Captain noted that in their department, “*Most officers are 'adult' officers and really don't have a clue as to the juvenile system.*”

A suburban, small-agency Police Chief mentioned the need for, “*funding to provide for a support unit (not necessarily sworn personnel) to manage preventive programs. We wait way too long to get involved with at-risk kids. We need to reach them at an earlier age before they get themselves into trouble.*”

Contrastingly, one small-agency, suburban police department Chief wrote about the desire for, “*a program that does not create a specialization for handling juveniles. I would like to see training for patrol officers that educates them on the best methods of addressing juvenile issues and not a program that encourages handing off the assignment to a specialist. I want everyone involved in juvenile issues.*”

Funding for department juvenile operations comes from a variety of sources. While the majority of departments (71%) report that the agency operating budget is their main financial source for youth services, departments also report non-agency funding allocations, grant funding, and other funding sources. Other funding sources include: co-funding through a partnership, state funding, fundraising efforts, school districts, and county budget and contracts. Chart 5 below highlights how survey participants' agencies fund juvenile operations.

Chart 5 Funding for Juvenile Operations

Though some departments report funding for juvenile operations, others have experienced cuts in funding and manpower affecting their work with youth. A Captain from a mid-sized, urban police department marked a decrease in efficiency due to a cut in manpower, *“Due to manpower shortages, our juvenile services division has been cut by two sworn officers. While we are able to continue with our juvenile and School Resource Officer Program, we would be more efficient if we were able to replenish our staffing levels.”*

A small-agency, police department Chief wrote, *“We previously had a school resource officer through a COPS [Department of Justice Community Oriented Policing Services] grant. Upon completion of the grant, the city and school district shared the cost of this position for several years. With recent funding cuts from the State of Minnesota, this position was eliminated. Since that time, we have had an increase of drug crimes in and out of schools. Our agency has applied for the most recent rounds of COPS funding in an effort to re-implement this program but we have not been successful to this point.”*

A Lieutenant from a suburban police department noted that juvenile justice is an area that is often considered when looking for places to cut funding. *“The juvenile detective or SRO [school*

resource officer] position has always been the first detective position to be cut and without funding assistance from the school district would likely be eliminated.”

Similarly, another Lieutenant from a suburban sheriff’s office noted, “Manpower is our greatest need. With the economy being so stressed and with the budget cuts, juvenile issues always seem to take the back seat. They get the most talk but the least amount of action and resolve.”

A mid-sized, suburban police department Chief noted, “For my agency the issue is resources. With past budget cuts, the ability to have a dedicated juvenile function is very limited. Continuing mandates in other areas, such as emergency management, intelligence, counter-terrorism and the need to provide officers on the street impact my agency. On the other hand, efforts to partner and regionalize juvenile investigations have been positive.”

One Chief from a small, rural police department noted that juvenile operations would improve if the department could, “put funding back in place for School Resource Officers since budgets are reducing. We lost 40% of our cops and school officers were among first to go. While D.A.R.E. may not have produced verifiable results, interaction between kids and cops does produce benefits.”

Other departments have current youth services funding, but have concerns for the maintenance of programming in the future. A Captain from a suburban police department noted “We are lucky to have a what we believe is a solid program, teaching D.A.R.E., G.R.E.A.T., G.R.E.A.T. Families, after school programs, and summer camps. Currently we struggle with sustainability issues and to maintain the youth programs that are desperately needed in our community. Without them, we would not have any other programs available. But when we apply for other grants we are compared with those who are a lot worse and not rewarded based on our successes. Eventually, we will be one of the worst.”

Policy and Procedure

The vast majority (88%) of agencies surveyed has written guidelines for responding to incidents involving juveniles/youth; however 12% of departments do not have guidelines. Of those that have written guidelines, 64% have general orders, 60% have standard operation procedures, and 17% have a departmental memo in place. Seven percent of departments cited other guidelines such as:

- division-based policies (n=2)
- Lexipol policies
- student code of conduct
- state law
- memorandum of understanding between agencies
- training bulletins
- county policies
- field guides
- written directives.

See Chart 6 below.

Chart 6 Types of Written Guidelines for Responding to Youth-related Incidents

Survey participants were asked what their agency would need to more effectively manage juvenile or youth-involved cases. Responses included:

- More manpower or dedicated staffing (n=136)
- Increased and better quality training opportunities (n=73)
- Funding (n=71)
- Additional school resource officers (n=19)
- Intra and inter-agency networking and collaboration and/or coordination with the juvenile justice system (n=14)
- Software, equipment and/or computers (n=13)
- Time (n=8)
- More resources to refer parents and juveniles (n=5)
- Access to updated information that will enhance understanding of evolving trends in other localities across the United States (n=3)
- Interest (n=2)
- Better understanding of juvenile laws and the way the juvenile system works (n=2)
- Infrastructure, change in philosophy, and making it a priority within agency
- Streamlined process
- Case studies
- Increased focus on prevention and intervention
- Support of State's Attorney Office
- More community-based options for diversion
- Stronger laws governing recidivism
- Alternatives to secure detention for low level offenders
- Reliable juvenile justice resources
- An in-house training unit designed to specifically meet the needs of community
- Follow up from a youth services organization that has authority and time to work with youth and follow up support to reduce recidivism
- Broader general familiarity with juvenile crime, prevention, and intervention issues
- Case review and screening process for the juvenile prosecutors at the County Attorney's Office
- A juvenile detention center

Some departments noted resource or program ideas that would help them improve juvenile operations. A police Lieutenant from a small, urban department wrote, *"We would find it beneficial to access all minors' information from other cities and counties to track minors who move from place to place, so that we could compare behavior trends, and criminal behavior of specific individuals--a central data base for law enforcement use only."*

Another urban police department detective noted the need for *"shared training information on juvenile issue, open discussions with other agencies on trends that are occurring among juveniles, and e-mail notifications from other agencies on important issues or incidents that might affect both the law enforcement community and the community we serve. Instant communication is the best way for all of us to keep up with the changes as they happen."*

One rural Police Chief from a small agency stated, “*Most of our crimes center around alcohol or drug issues. We have a fairly high percent of juveniles being treated in outpatient settings for substance abuse. A dynamic program for law enforcement officers that can also be tailored towards parents and educators would be very helpful.*”

Training

Training Budget

Of responses, 5% did not have an annual training budget last year. Another 19% had a budget of \$5,000 or less. Thirty-four percent had a budget between \$5,000 and \$20,000 and 42% had a budget of more than \$20,000.

More poignantly, over half of departments have seen a decrease in their training budget over the last five years with several departments (n=5) seeing an abolishment of their training budget. Chart 7 shows gradations in responses below.

Chart 7 Training Budget Over the Last Five Years

Training Recipients

Considering limited resources, 80% of survey participants indicated that their departments target juvenile justice training to uniform police officers, investigators, and first responders.

Training Methods

Departments take advantage of multiple methods to train their staff. Approximately 82% of departments provide training with in-house trainers and almost 75% provide training using state-level training agencies. Off-site contracted trainers and national associations are also widely used by the survey participants. Other responses include:

- partnering with other law enforcement agencies
- state-wide online training
- county-level training
- joint training
- regional training
- university, community, and technical colleges.

Chart 8 below shows the summary of responses.

Departments consider several factors when deciding which training opportunities they will provide or access. As seen in Table 1, over 89% of survey participants take overall department training needs into account and 65% consider staff requests. Sixty-eight percent of departments consider training costs as an important factor in providing or accessing training. Other responses include:

- surveys
- command personnel feedback
- mandatory departmental training
- requests through a training committee
- annual certification requirements
- location
- trends and incidents uncovering needed training
- collective bargaining agreements.

Table 1

How does your agency decide which training opportunities to provide or receive? (Check all that apply)		
Answer Options	Response Percent	Response Count
Overall department training needs	89.4%	474
State mandates	71.21%	377
Training costs	68.1%	361
Staff requests	64.7%	343
Performance evaluations	19.4%	103
Other	5.5%	29
	<i>answered question</i>	530
	<i>response left blank</i>	142

When asked the primary reason prohibiting them from receiving juvenile justice training, agencies cited funding (53%) as the number one issue. Lack of manpower (17%) and lack of subject-specific training opportunities (14%) also had a significant impact on some departments, as seen below in Table 2.

Table 2

What is the PRIMARY reason that has or may prohibit your agency from receiving training on juvenile justice issues?		
Answer Options	Response Percent	Response Count
Funding (training costs including travel, lodging, registration)	53%	281
Agency resources (lack of manpower)	17.4%	92
Lack of subject-specific training opportunities	14.2%	75
Does not apply	10.4%	55
Other	3.4%	18
Lack of interest	1.7%	9
	<i>answered question</i>	530
	<i>response left blank</i>	142

Other reasons cited for not receiving juvenile justice training include:

- “Not much training offered in our area” (n=4)
- “Very small juvenile population” (n=2)
- “Lack of understanding on the importance of juvenile issues within the law enforcement community”
- “Juveniles are mostly handled by issuing citations. Otherwise by established court procedures.”
- “Training may not be listed as “mandated” in our training plan, which is the only classification of training we are currently funding.”
- “Lack of prosecution of juvenile crime under state law”
- “Most juvenile cases are handled directly by the county juvenile authorities”
- “My leadership is not interested in pursuing this matter.”
- “Lack of need”

Multiple agencies noted the lack of funding and manpower preventing their ability to provide juvenile justice training. A Senior Parole Officer in a state parole agency noted, *“We simply have too many cases and too few officers to be able to provide any quality training.”*

One Sergeant from a small, rural police department noted the lack of priority for juvenile justice training within their department. *“We just need to work more closely with our probation officer on juvenile cases and trends. We also do not have a huge interest from the officers for youth related training. They are more interested in the high speed stuff. So we just do not see the requests to go to this type of training. Money and time is usually not an issue for our agency. We just need to be made aware of the training that is available.”*

Additionally, as seen in Chart 9 below, 76% of respondent states do not mandate juvenile justice training for law enforcement beyond basic training academies. This statistic backs up the previous data showing that departments often do not receive juvenile justice training due to various reasons, if not mandated.

Chart 9 Post-Academy Training on Juvenile/Youth Issues Mandated by State

Table 3 shows training methods survey participants use to deliver juvenile justice training within their agencies. Outside agency trainings received the most responses, with 73% of the survey population, followed by in-service training (70%) and roll call training (55%). Seventeen survey participants included other methods such as online training, (e-mail or web-based), and multimedia, such as video.

Table 3

Beyond academy-level training, what other method(s) does your department employ for delivering training on the topic of juvenile/youth involved incidents? (Check all that apply)		
Answer Options	Response Percent	Response Count
Outside agency (e.g., conferences, meetings, regional trainings)	72.4%	296
In-service	70.2%	287
Roll call	55.3%	226
In-house certified	27.6%	113
In-house non-certified	20.5%	84
Field	18.8%	77
Does not apply	3.2%	13
Other (please specify):	4.2%	17
	<i>answered question</i>	409
	<i>response left blank</i>	263

Some responding departments provide in-house training on juvenile justice topics. Table 4 below displays topics departments train on and the average number of hours on each topic as identified by survey participants. In additions to the below topics, departments noted other juvenile justice classes offered including suicide prevention, mental health, bullying, school resource officer training, child abuse reconstruction/death investigation, juvenile laws, sexual assault interviewing, use of force, and arrest procedures/processing.

Table 4

Please select topics on which your agency provides training and the number of hours dedicated to each topic.			
Answer Options	Response Percent	Response Count	Average # of Hours
General trainings on issues related to juveniles/youth	57.6%	171	10
School safety and crisis management	54.2%	161	13
Gangs	49.2%	146	10
Interviewing and interrogating juveniles/youth	45.1%	134	9
Computer crime and Internet safety involving juveniles/youth	40.7%	121	23
Substance abuse among juveniles/youth	34%	101	10
Juvenile offender prevention and intervention programs	26.3%	78	15
Juvenile/youth-involved domestic violence	24.6%	73	8
Gun violence	18.5%	55	5
Truancy	17.9%	53	4
Adolescent psychology	7.7%	23	11
Other	6.7%	20	8
	<i>answered question</i>	297	
	<i>response left blank</i>	374	

When asked what training methods are most effective, 73% of agencies chose scenario-based or case studies. Interactive activities (48%), lecturettes (41%), and discussion/brainstorming (40%) were also cited as effective. Other methods such as role play and worksheets received a lower response rate. Survey participants also mentioned training methods such as DVD, rapid response, and a hybrid of multiple methods.

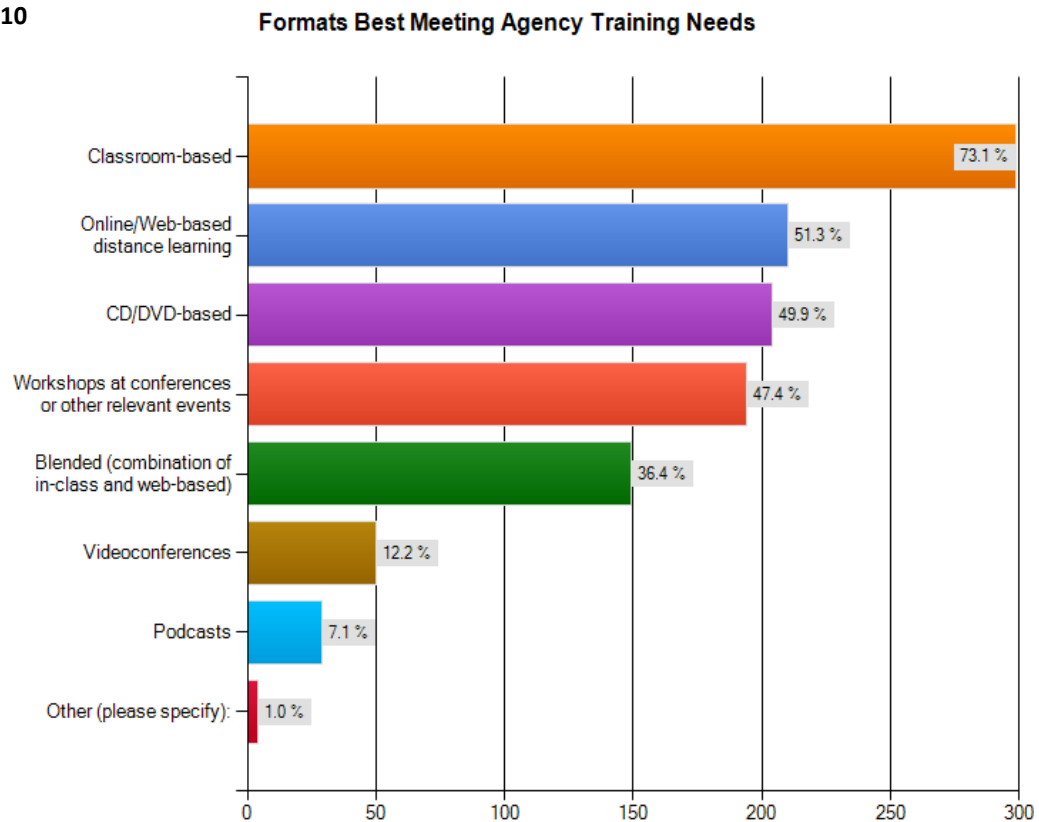

Table 5

Based on participant feedback, what methods are most effective in law enforcement training for your agency? (Check all that apply)		
Answer Options	Response Percent	Response Count
Scenario-based or case studies	72.8%	296
Interactive activities	48.2%	197
Videos	41.7%	170
Lecturettes (no longer than 15 minutes)	41.1%	168
Discussion/Brainstorming	40.3%	165
Role plays	20.5%	84
Worksheets/Self-use forms	11.5%	46
Other	0.7%	3
	<i>answered question</i>	409
	<i>response left blank</i>	263

Juvenile Justice Training Needs

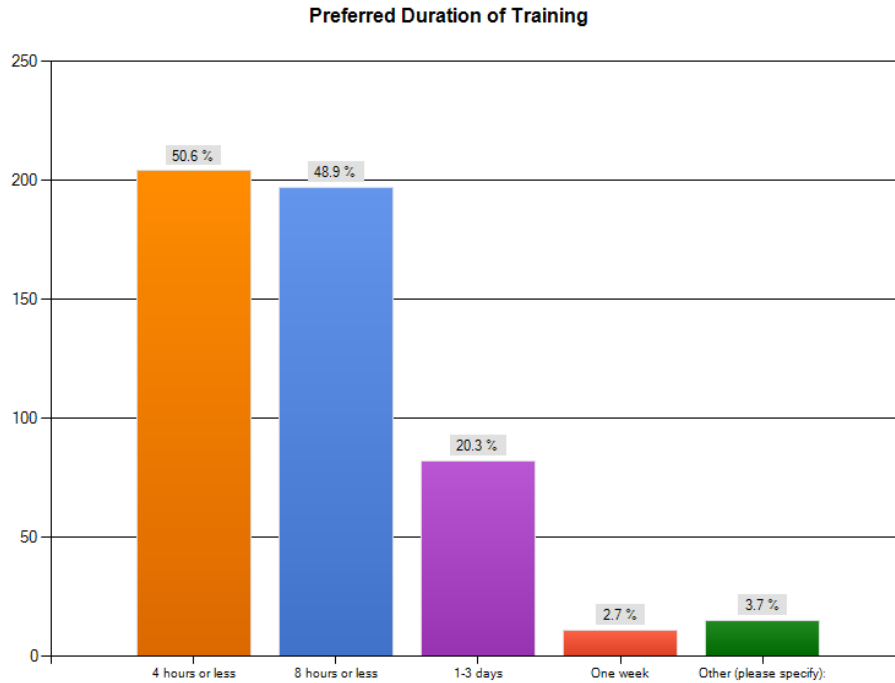

Chart 10 shows various formats in which departments receive training and the formats they cite as best meeting their needs. Seventy-three percent cited classroom-based training as a viable resource for them, while over 51% mentioned online or web-based learning as a format they find valuable. CD/DVD-based learning and workshops at conferences also received a note-worthy response rate, as well as blended learning options. Videoconferences and podcasts were shown to have a lower response rate. Other responses included regional trainings and working directly with youth.

Chart 10

Survey participants were asked to cite the preferred duration of training for their agency. Over half (n=207) chose four hours or less and just under half (n=201) chose eight hours or less. Twenty percent (n=83) of departments cited trainings of one to three days as preferred. Trainings over three days long received the lowest number of responses, at only three percent (n=11). Four percent suggested other preferences, such as 10-hour training days, train-the-trainer courses, and roll call training.

Chart 11

Some departments noted that their agency needs equipment to enable officers to access available training. While almost a third of agencies cited they did not need equipment, 39% mentioned the need for videoconferencing equipment and 37% need computers. Almost a third need software, 27% need DVD/CD equipment, and 23% need increased or enhanced internet capability. Other responses include audiovisual equipment, such as a projector or smart board, and simulation training aids. Table 6 shows response counts.

Table 6

What equipment, if any, does your agency need to enable officers more access to available training? (Check all that apply)		
Answer Options	Response Percent	Response Count
Videoconferencing equipment	39.1%	160
Computer equipment	37.1%	152
None	29.8%	122
Software	28.4%	116
DVD/CD equipment	27.1%	111
Increased/enhanced Internet capability	23.2%	95
Other	3.4%	14
	<i>answered question</i>	409
	<i>response left blank</i>	263

Most Pressing Juvenile Justice/Youth Issues

Departments were asked to choose the top five most pressing juvenile justice/youth issues affecting their agencies. The top eight responses were:

- **Substance Abuse** (n=260)
- **Abuse (physical, sexual, and emotional)** (n=240)
- **Juvenile Repeat Offenders** (n=202)
- **Bullying/Cyberbullying** (n=201)
- **Gangs** (n=184)
- **Internet Crimes involving juveniles/youth (as perpetrator/victim)** (n=150)
- **Runaways** (n=149)
- **School Safety** (n=143)

Chart 12 Top Juvenile/Youth Issues or Concerns affecting Agencies

Other areas identified as pressing include:

- sexting and abuse of social media and technology (n=4)
- alcohol abuse (n=3)
- property crime (n=3)
- disorderly juveniles (n=2)
- lack of after-school activities (n=2)
- narcotics smuggling
- teen suicides
- breakdown of the family
- criminal damage
- violent acts committed by persons under 16 but over 11

- juvenile violent crime
- education of youth on importance of environmental laws
- graffiti.

Most Pressing Issues for Rural Agencies

When broken down into jurisdiction type, responses reflect only slight differentiation between issues affecting rural, urban, and suburban areas. Out of 93 rural responses to this question, the top five issues were abuse (physical, sexual, and emotional) (71% or n=66), substance abuse (70% or n=65), juvenile repeat offenders (52% or n=48), bullying/cyber-bullying (50% or n=46) and Internet crimes involving juveniles/youth (as perpetrator or victim) (42% or n=39). Table 7 shows response counts for each juvenile justice survey topic.

Table 7

Top Youth Issues for Rural Jurisdictions	Response Count
Abuse(physical, sexual, emotional)	66
Substance abuse	65
Juvenile repeat offenders	48
Bullying/cyberbullying	46
Internet crimes involving juveniles/youth (as perpetrator or victim)	39
School safety	37
Runaways	31
Juveniles with mental illness or other disabilities	28
Truancy and drop outs	26
Gangs	25
Lack of positive police/youth interaction	18
Crimes committed by or incidents involving adolescent girls	10
Gun violence	7
Increase in violence by children 11 and under	6
Disproportionate minority contact	4
Child trafficking	3
Other (property crime):	2
<i>answered question 93</i>	
<i>response left blank 44</i>	

Most Pressing Issues for Urban Agencies

There were 141 responses from urban jurisdictions that yielded the following top five youth issues: gangs (62% or n=88), abuse (physical, sexual, and emotional) (57% or n=81), juvenile repeat offenders (53% or n=75), substance abuse (51% or n=72), and bullying/cyber-bullying (43% or n=60). Table 8 below details urban jurisdiction responses for juvenile justice survey topics.

Table 8

Top Youth Issues Affecting Urban Jurisdictions	Response Count
Gangs	88
Abuse(physical, sexual, emotional)	81
Juvenile repeat offenders	75
Substance abuse	72
Bullying/cyberbullying	60
Runaways	53
Truancy and drop outs	43
Internet crimes involving juveniles/youth (as perpetrator or victim)	41
School safety	37
Gun violence	33
Juveniles with mental illness or other disabilities	23
Lack of positive police/youth interaction	22
Crimes committed by or incidents involving adolescent girls	19
Disproportionate minority contact	11
Child trafficking	10
Other (auto theft, sexting, alcohol use, juvenile violent crime, disorderly conduct, criminal damage, graffiti)	8
Increase in violence by children 11 and under	7

Most Pressing Issues for Suburban Agencies

One-hundred and forty-four suburban jurisdictions designated their top five youth issues as substance abuse (75% or n=108), bullying/cyber-bullying (56% or n=81), abuse (physical, sexual, and emotional) (56% or n=81), juvenile repeat offenders (46% or n=66), and school safety (42% or n=60). Table 9 below details responses for suburban jurisdictions and their top juvenile justice/youth concerns.

Table 9

Top Youth Issues Affecting Suburban Jurisdictions	Response Count
Substance abuse	108
Abuse(physical, sexual, emotional)	81
Bullying/cyberbullying	81
Juvenile repeat offenders	66
School safety	60
Internet crimes involving juveniles/youth (as perpetrator or victim)	57
Runaways	57
Gangs	56
Truancy and drop outs	32
Juveniles with mental illness or other disabilities	28
Lack of positive police/youth interaction	27
Crimes committed by or incidents involving adolescent girls	14
Gun violence	11
Disproportionate minority contact	10
Child trafficking	9
Other (teen suicides, narcotics smuggling, sexting, lack of after-school activities, property crime, abuse of social media, unruly behavior)	9
Increase in violence by children 11 and under	7
<i>answered question 144</i>	
<i>response left blank 82</i>	

Most Pressing Issues by Agency Size

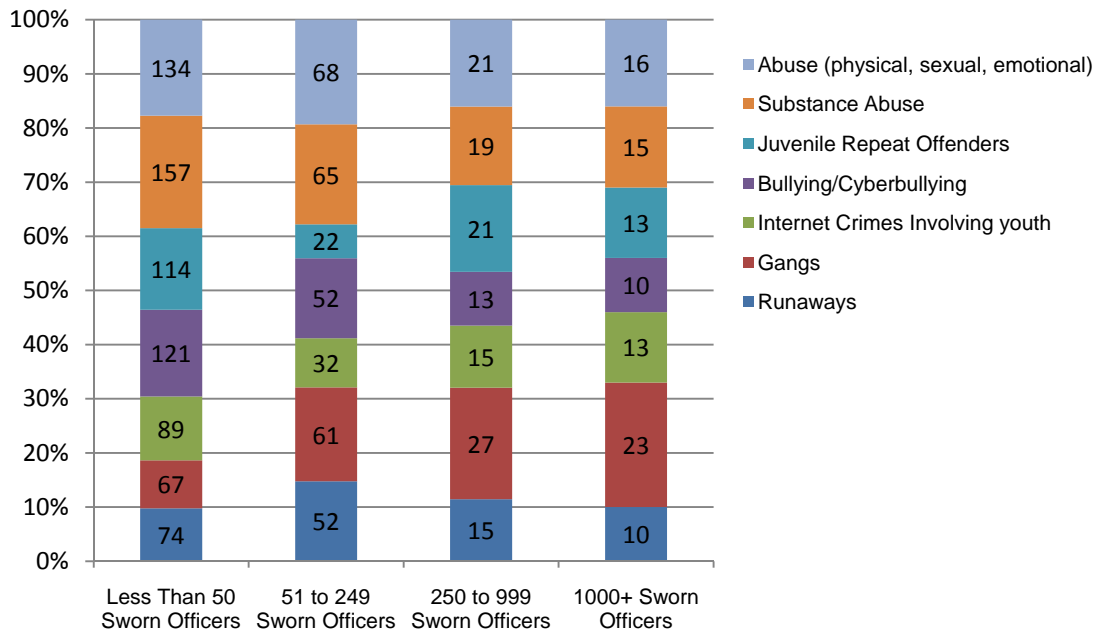

Seven youth issues were chosen as the top five juvenile justice concerns of jurisdictions, when the data is broken down and compared by agency size:

- abuse (physical, sexual, emotional)
- substance abuse
- juvenile repeat offenders
- bullying/cyberbullying
- internet crimes involving youth
- gangs
- runaways

As shown in Chart 13 below, gangs are in the top five youth concerns for agencies having more than 50 sworn officers, but not for agencies with less than 50 sworn officers. Runaways are not in the top five issues for agencies with over 1000 sworn officers or agencies with less than 50 sworn officers, but it is in the top five for agencies with 51 to 999 sworn officers. Internet crimes involving youth and juvenile repeat offenders are in the top five pressing concerns for all size categories, except for agencies with 51 to 249 sworn officers. Bullying

/cyberbullying is in the top five most pressing concerns for agencies with 250 or more sworn officers, but not for agencies with less than 250 sworn officers. Both abuse (physical, sexual, emotional) and substance abuse are in the top five most pressing youth concerns for all responding jurisdiction sizes.

Chart 13 Top Seven Most Pressing Youth Issues Affecting Agencies

Additionally, several departments mentioned specific training or technical assistance needed to more effectively manage youth involved cases. A Corporal from a large, urban police department noted the need for “*guidance on areas where we are deficient and direction regarding how to correct the deficiencies*” and a Chief from a small, rural police department noted their need for “*a series of short roll call videos that can be shown to groups or watched individually. This could also be accomplished through web access to a series of presentations on various topics.*”

Conclusion

In summary, law enforcement surveyed noted various challenges within their departments and/or within the juvenile justice system in which they work that affect their day to day juvenile operations. Whether it is lack of funding, manpower, resources, training, or departmental buy-in, law enforcement agencies across the country identified a plethora of needs to improve their work involving youth.

Responses to this national survey show the need for no-cost/low-cost juvenile justice training and technical assistance, specifically due to agency funding cuts and restrictions. The responses also highlight the weaknesses within some departments regarding juvenile justice policies and procedures, juvenile justice training provided and guidelines to responding to youth incidents. Agencies indicated that they need more money, equipment, manpower, time, and training to effectively manage youth-involved cases. Open-ended responses show the frustration in barriers to managing these cases, as well as the desire for preventative youth programming, increased collaboration between agencies, and a better understanding of the juvenile justice system. Some agencies portray the need for more centralization within departmental juvenile justice operations, while others discuss the need to inform and train everyone within the department on youth issues.

Overall, the anecdotal evidence provided by chiefs, command staff, and first-line law enforcement officers, both civilian and sworn, shows there are needs within departments to improve juvenile operations. There is also a demand for more coordination within departments and collaboration among departments.

The need for training and technical assistance was a common thread throughout survey responses, as having more knowledgeable officers working with youth will provide more positive outcomes. Also, making juvenile justice a priority and getting the proper agency buy-in is a large hurdle in ensuring the effort has the resources and support that it needs.

There is a need for increased positive interaction between youth and police, to increase potential for diversion, to refer at-risk youth to available preventative resources within the community, and to help define effective and positive juvenile justice policies and procedures that can be implemented by law enforcement.

The survey results show law enforcement departments around the nation have the desire to improve their work with youth, and seek to effectively manage youth-involved cases, and ultimately strive to minimize juvenile crime, delinquency, and victimization. What law enforcement agencies need now are continued support, pertinent training and useful tools and resources to ensure that the manpower dedicated to these issues is properly trained and prepared to bring more positive interventions with youth.

Appendix I: Survey Instrument

Assessing Law Enforcement Juvenile Justice Training Needs Survey

The International Association of Chiefs of Police (IACP) has undertaken a comprehensive review of its law enforcement-focused juvenile justice training courses. As principal consumers of these courses, we would like your input as we prepare our strategic plan for future training courses that focus on interactions between law enforcement professionals and youth. Your answers to this short (20-minute) survey will inform our work and ensure that future training services provided by the IACP's Juvenile Justice Training and Technical Assistance Project meet your needs and expectations. It is important that the survey be completed by command staff with responsibility for and/or knowledge of juvenile justice issues and training needs in your agency. Thank you!

Part I: Agency and Jurisdiction Information

In this section, we will ask you questions about your agency and jurisdiction.

1. Please indicate the number of sworn officers in your agency.

- Less than 20 21-50 51-99 100-249
 250-499 500-999 1,000 & above Does not apply

2. Number of civilian staff: _____

3. Please select descriptors that best describe your jurisdiction:

a. Agency:

- Police Sheriff State Police University/Campus Police
 Other (specify): _____

b. Jurisdiction Type:

- City County State Federal Tribal
 Other (specify): _____

c. Geographic Area:

- Urban Rural Suburban Other (specify): _____

Part II: Juvenile Operations

In this section, we will ask about the resources devoted to juvenile operations in your agency.

4. Which of the following best describes the structure of your agency's juvenile justice/youth services?

- A centralized department/unit (e.g., juvenile division, youth services) that processes juvenile cases and services
- On-site juvenile/youth program (e.g., prevention, intervention) staff
- Juvenile/youth-related services provided by various units, but no central unit with oversight
- A juvenile/youth officer or individual assigned
- No individual personnel assigned
- Other (specify): _____

5. If your agency has a department/unit designated for juvenile services, how is the department/unit staffed? (Check all that apply and indicate number in space provided)

- Number of sworn officers assigned _____
- Number of non-sworn personnel _____
- Number of volunteers _____
- Does not apply

6. How are juvenile operations funded in your agency? (Check all that apply)

- Agency operating budget
- Non-agency funding allocation (i.e., regional/partnership funding)
- Federal/non-federal grant
- Does not apply
- Other (specify): _____

7. Does your agency have written guidelines for responding to incidents involving juveniles/youth? Yes No If yes, what type? (Check all that apply)

- General orders
- Departmental memo
- Standard operating procedures (SOPs)
- Other (specify): _____

Part III: Training

Now we would like to obtain information on training in general, as well as the resources devoted to enhance juvenile/youth case processing in your agency.

8. What was your agency's annual training budget last year? \$ _____

9. Over the last five years, your training budget has: (Choose one)

- Increased

- Decreased
- Stayed the same
- Been abolished

10. How does your agency decide which training opportunities to provide or receive? (Check all that apply)

- Overall department training needs
- Staff requests
- Performance evaluations
- Training costs
- State mandates
- Other (specify): _____

11. How is training generally provided? (Check all that apply)

- In-house agency trainers State-level training agencies
- Off-site contracted trainers National associations/organizations
- Other (specify): _____
- Does not apply

12. When searching for training opportunities, what resources do you use? (Check all that apply)

- Contact Peace Officer Standards and Training (POST) Commission or state training agency
- Respond to e-mail marketing from reputable training sources
- Partner with other law enforcement agencies
- Use training catalogs
- Confer with state law enforcement associations
- Other (specify): _____

13. What are the top three organizations you turn to for external training? (Please name at least one)

14. What is the primary reason that has or may prohibit your agency from receiving training on juvenile justice issues?

- Funding (training costs including travel, lodging, registration)
- Agency resources (lack of manpower)
- Lack of interest

- Lack of subject-specific training opportunities
- Other (specify): _____
- Does not apply

15. With limited training resources, which rank do you prioritize for training topics related to juveniles/youth?

- First line tactical officers
- Civilian non-sworn
- Uniform police officers, investigators, first responders
- Executives, command
- Does not apply

Part IV: Training Needs

Next, we would like to learn more about your priorities for training.

16. What are the top five most pressing juvenile/youth issues and concerns currently affecting your agency?

- Abuse (physical, sexual, emotional) Bullying/Cyberbullying
- Child trafficking Crimes committed by or incidents involving adolescent girls
- Disproportionate minority contact Gangs Gun violence
- Increase in violence by children 11 and under
- Internet crimes involving juveniles/youth (as perpetrator or victim)
- Juvenile repeat offenders Juveniles with mental illness or other disabilities
- Lack of positive police/youth interaction Runaways School safety
- Substance abuse Truancy and drop outs Other (specify): _____

17. Beyond academy-level training, what other method(s) does your department employ for delivering training on the topic of juvenile/youth-involved incidents? (Check all that apply)

- Roll call In-service In-house certified In-house non-certified
- Field Outside agency (e.g., conferences, meetings, regional trainings)
- Other (specify): _____
- Does not apply

18. Is beyond academy-level training on juvenile/youth issues mandated by your state?Yes No **19. Please check or list topics on which your agency provides training and the number of hours dedicated to that topic:**

- Adolescent psychology_____
- Computer crime and Internet safety involving juveniles/youth_____
- Juvenile/youth-involved domestic violence_____
- Gangs_____
- Gun violence_____
- Interviewing and interrogating juveniles/youth_____
- Juvenile offender prevention and intervention programs_____
- School safety and crisis management_____
- Substance abuse among juveniles/youth_____
- Truancy_____
- General training on issues related to juveniles/youth_____
- Other (specify): _____
- Does not apply

20. What format(s) would best meet your agency's training needs? (Check all that apply)

- Classroom-based
- Workshops at conferences or other relevant events
- Online/Web-based distance learning
- Videoconferences
- CD/DVD-based
- Blended (combination of in-class and web-based)
- Podcasts
- Other (specify): _____

21. Based on participant feedback, what methods are most effective in law enforcement training for your agency? (Check all that apply)

- Lecturettes (no longer than 15 minutes)
- Scenario-based or case studies
- Interactive activities
- Role plays
- Discussion/Brainstorming
- Worksheets/Self-use Forms
- Videos
- Other (specify): _____

22. What duration of training is preferred regardless of method? (Check all that apply)

- 4 hours or less
- 8 hours or less
- 1-3 days
- One week
- Other (specify): _____

23. What equipment, if any, does your agency need to enable officers more access to available training? (Check all that apply)

- Computer equipment
- Increased/enhanced Internet capability
- Software
- DVD/CD equipment
- Videoconferencing equipment
- None
- Other (specify): _____

24. What would your agency need to more effectively manage juvenile or youth-involved cases?

25. What best describes your function/assignment?

- Administration
- Field Operations
- Information Technology
- Patrol/Investigations/Tactical
- Communications
- Training
- Other (specify): _____

Respondent Information

Name: _____

Title/Rank: _____

Department/Agency: _____

City: _____ State: _____ Zip: _____

E-mail: _____

Phone: _____

Thank you very much for completing this survey. Please direct questions or comments about this survey to Sabrina Rhodes at rhodes@theiacp.org or 1-800-843-4227 ext. 831.
